

## ***Ulster's "new" war - Internationally organised criminal drugs gangs***

Since the ceasefires, there has been a rise in internationally organised criminal drugs gangs operating in Ulster. Parts of Belfast and elsewhere have been afflicted, notably in areas that have been left virtually lawless as a result of years of IRA violence and misery. These communities learn to 'accept' drugs and criminality as a way of life, having no respect for law, social morality or decency!!

**FACT:** the misuse of hard drugs is on the increase and this filth can be bought easily at top nightclubs or on the street with vast profits for the gangs. Recent seizures of large cannabis factories along the North Coast, run by Chinese 'Triad' members, and a seizure of weapons destined for Ulster, is a small token in terms of how these gangs operate and how they intend to protect their profits and luxurious lifestyle by force!!

If these gangs cannot be stopped by legal means, it is a moral right for any community to act. In the past, these parasites got beaten-up, shot or were driven into exile into Scotland, Wales, England or the Irish Republic. Nowadays the PSNI either protect them in return for a cut of their profits or intelligence, or ship them off to the North Coast, notably Portrush, to carry on what they do best - cripple and infect entire communities!!

***Ulster BPP say -***

***Drugs kill...***

***HANG THE PUSHERS!!***
